WHY CARS FAIL THE APK

What the inspector finds

Cars built 2011 to 2022, inspected June 2022 to November 2026.

TODAY ON THE SITE

70% of APK defects are upkeep: tyres, bulbs, headlight aim, wipers.

Faults of the car

% of model faults

Brakes 23%
Brakes that bind or pull to one side, corroded brake pipes, worn brake hoses, a weak handbrake

Oil and fluid leaks 11%
Too much oil or other fluid leaking from under the car

Warning lights 10%
A fault light on the dashboard: airbag or seat belt, ABS, stability control, tyre pressure

Suspension joints 9%
Ball joints with play, torn joint covers, worn axle arms and anti-roll bars

Exhaust and emissions 9%
An exhaust that leaks or hangs loose, emissions over the limit, a particulate filter that fails

Steering 8%
Torn steering rack covers, track rod ends with play, power steering leaks

Springs and shock absorbers 7%
Broken coil springs, shock absorbers that no longer work

Wheel bearings and wheels 6%
Worn wheel bearings, damaged rims, loose wheels

Drive shafts 5%
Torn or loose drive shaft covers (CV boots)

Seat belts and seats 3%
Damaged belts, buckles and belt reels that fail, loose seats

Upkeep: check before the APK

% of upkeep items

Tyres 41%

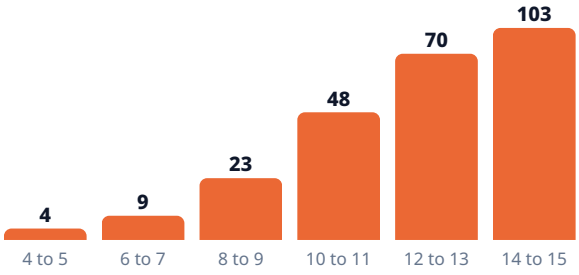

Bulbs and lamps 28%

Headlight aim 17%

Wipers and washers 11%

HOW WE PICK

Where the figures come from

Picks

- Best score in its group, one build year per model. No car is picked by hand.
- At least 5 adverts per model-year; 500 registered cars for the reliability lists.
- Faults: APK defects that are not upkeep, against the average car of the same age.

Sources

- Prices, mileage, for sale: 216,436 adverts, 23 November 2026.
- APK defects: RDW open data, June 2022 to November 2026.
- Photos: Wikimedia Commons, examples of each model, not cars for sale.
- Icons: Tabler Icons (MIT) and our own.
